Titre : *Splitting Universes in AdS_4/CFT_3*

Orateur : **Costas Bachas (LPT ENS)**

Résumé : *I will first review a large class of conjectured AdS_4/CFT_3 dual pairs with half-maximal ($N=4$) supersymmetry. I will then discuss (1) some recently derived facts about the spectrum of operators, and (2) a special degeneration limit in which the theory splits in two disconnected worlds.*
