Strings, integrability and beyond

Mercredi 26 Septembre 2018, 11 :30

LPTENS, LPTENS Library

Domaines : hep-th

Titre : *R-matrices, parameter permutations and intertwining operators*

Orateur : **Sergey Derkachov** (**St. Petersburg Department of the Steklov Institute of Mathematics RAS**)

Résumé : *We construct R-operators, the general solution of the Yang-Baxter equation, in a uniform way for three symmetry algebras : $SL(2,C)$ -symmetry, Faddeev modular double symmetry (q -deformation) and Sklyanin's algebra symmetry (elliptic deformation).*
