Particle Theory Seminar of LPT Orsay

Jeudi 16 Mai 2019, 16 :00
LPT, 114
Domaines : hep-ph

Titre : *Unification and precision physics*

Orateur : **James Wells (University of Michigan)**

Résumé : *I will attempt to clarify what it takes for gauge coupling unification to be viable and describe the impact of recent experiment on the answer to that question. I will also briefly review the motivation for deviations of the Higgs couplings to bottom quarks and then discuss what it will take experimentally and theoretically to get to the required precision determination.*
