

**Institut Henri Poincaré**  
11 rue Pierre et Marie Curie, 75231 Paris cedex 05  
**String Theory in Greater Paris**

**Rencontres Théoriciennes**  
**“Supergravité, théorie des cordes et théorie M”**

*Jeudi 18 Juin 2020, 11:00*

**Stephan Stieberger**

**Symmetries of celestial amplitudes**

*The celestial sphere is the target space for the proposal of flat space holography in which four-dimensional physics is encoded in two-dimensional celestial conformal field theory (CCFT). After giving some motivations we introduce the concepts and properties of physics on the celestial sphere. We shall discuss symmetries and properties of celestial amplitudes. After introducing the concept of soft theorems on the celestial sphere we shall give an explicit field realization of the operators generating superrotations and supertranslations. Finally we construct the full extended BMS Algebra of CCFT.*

**Institut Henri Poincaré, salle 314, 3<sup>ème</sup> étage**
