## Seminar of the theory group of APC

**Mardi 9 Novembre 2021, 14 :00**

APC, seminar room 483A, contact [roperpol@apc.in2p3.fr](mailto:roperpol@apc.in2p3.fr) for Zoom meeting details

Domaines : gr-qc

Titre : *Gravitational Bremsstrahlung in the Post-Minkowskian expansion*

Orateur : **Massimiliano Maria Riva ( IPhT )**

Résumé : *I will discuss the scattering of two compact objects interacting via gravity, using the so-called world-line Effective Field Theory approach in the post-Minkowskian expansion (i.e. expanding in the Newton's constant  $G$  but not in the velocities). In particular, I will focus on the computation of classical observables such as the total emitted momentum. This is obtained by phase-space integration of the graviton momentum weighted by the modulo squared of the radiation amplitude. It can be recast as an effective cut two-loop integral that I will solve using techniques borrowed from collider physics.*
